

Create The IBM Watson IoT Platform And A Device

Date	06 November 2022
Team ID	PNT2022TMID54368
Project Name	Smart Farmer - IoT Enabled Smart Farming Application
Maximum Marks	2 Marks

The screenshot displays the IBM Watson IoT Platform web interface. The browser address bar shows the URL: `wg5r5d.internetofthings.ibmcloud.com/dashboard/devices/browse`. The page title is "IBM Watson IoT Platform". The user is logged in as "manjarim295@gmail.com" with ID "wg5r5d". The main navigation bar includes "Browse", "Action", "Device Types", and "Interfaces". A blue "Add Device" button is visible in the top right. The "Browse Devices" section has two tabs: "All Devices" (selected) and "Diagnose". Below the tabs, a text block states: "This table shows a summary of all devices that have been added. It can be filtered, organized, and searched on using different criteria. To get started, you can add devices by using the Add Device button, or by using API." A search bar labeled "Search by Device ID" is present. To the right of the search bar, there is a "Device Simulator" toggle switch (currently off) and a filter icon. Below these elements is a table with the following headers: "Device ID", "Status", "Device Type", "Class ID", and "Date Added". The table body is currently empty. The Windows taskbar at the bottom shows the system clock as 12:42 on 12/11/2022, with a weather forecast of 29°C and "Rain to stop".
